

Assignment 1: Simple web page

The assignment

Build a web page that looks as similar as possible to the one in the screenshot at <http://www.cs.uky.edu/~raphael/courses/CS316/project1/asg.cafe-1.png>. The title of the page (which is not shown in the screenshot) should be `Munshn Lunshn`.

Method

You may only use HTML without recourse to any CSS stylesheets or JavaScript libraries. Your web page should validate without warnings or errors at the W3C online validator (accessible via the developer console).

You may refer to online resources and books, but you must not share your work with others.

Useful information

- (1) Some important Unicode symbols (in hex):

trademark	2122
apple	1F34E
drink	1F378
chicken	1F357
cake	1F382
milk bottle	1F37C
dog	1F415
pizza	1F355
balloon	1F388
skull	2620

- (2) The entire page is in font `Free Serif`.
- (3) The non-default colors in the page are beige (the table), blue (some borders), green (some text and borders), red (some borders, some text), yellow ("under construction").
- (4) You must use explicit `style` attributes, not a `<style>` section.
- (5) The web page must be self-contained, with no references to other files.
- (6) The web page may not use JavaScript.

Turn in

Turn in your web page (a single file called `cafe-1.html`) via Canvas.
